### Lessard-Sams Outdoor Heritage Council Laws of Minnesota 2012 Final Report

Date: September 20, 2018

Program or Project Title: Minnesota Buffers for Wildlife and Water Phase 2

Funds Recommended: \$2,090,000

Manager's Name: Tabor Hoek

Organization: BWSR Address: 1499 E. Lyon St. City: Marshall, 56258

Office Number: 507-537-7260 Email: tabor.hoek@state.mn.us

Legislative Citation: ML 2012, Ch. 264, Art. 1, Sec. 2, Subd. 2(a)

CLEAN WATER LAND & LEGACY AMENDMENT

Appropriation Language: \$2,090,000 in the second year is to the Board of Water and Soil Resources in cooperation with Pheasants Forever to acquire permanent conservation easements to enhance habitat by expanding clean water fund riparian wildlife buffers on private land. A list of proposed permanent conservation easements must be provided as part of the final report. The accomplishment plan must include an easement stewardship plan. Up to \$90,000 is for establishing a monitoring and enforcement fund as approved in the accomplishment plan and subject to Minnesota Statutes, section 97A.056, subdivision 17. An annual financial report is required for any monitoring and enforcement fund established, including expenditures from the fund and a description of annual monitoring and enforcement activities.

County Locations: Blue Earth, Brown, Cottonwood, Faribault, Kandiyohi, Le Sueur, McLeod, Meeker, Murray, Nicollet, Nobles, Redwood, and Renville.

#### Regions in which work was completed:

- Prairie
- Metro / Urban

#### Activity types:

• Protect in Easement

#### Priority resources addressed by activity:

• Prairie

#### **Summary of Accomplishments:**

RIM Buffers Phase II combined the resource benefits of the Outdoor Heritage Fund (LSOHC), Clean Water Fund (CWF), and bond funds. This program enrolled a total of 1,336.7 acres of enhanced wildlife and water quality buffers in partnership with private landowners on 29 easements. With 1337 acres (all sources of funding) protected and restored in this phase, we exceeded the original goal of 400 acres of OHF funded buffers and 400 acres of CWF funded buffers. Bonding dollars were used to fund the remaining 537 acres.

#### **Process & Methods:**

The Lessard-Sams Outdoor Heritage Council provided a recommendation to fund the first phase of RIM Buffers, which provided \$2,249,000 and played a part in securing 1,595.4 acres of permanent protection. This second phase of RIM Buffers built upon the successes and momentum of that first phase, securing 1,336.7 acres of permanently established buffers that will continue to provide critical water quality improvements and improved nesting habitat.

This partnership program permanently added grassland habitat and reduced fragmentation by combining the efforts of the Outdoor

Heritage Fund, Clean Water Fund, and bonding to secure buffers adjacent to public waters. Building upon the 100-foot RIM buffers funded through the Clean Water Fund, we added an additional buffer width (up to NRCS 393 standard for CRP buffers) to make clean water buffers more attractive and productive for wildlife. This program contributed toward the development of new habitat complexes and enhancement of existing habitats by expanding the size of narrow corridors and connecting them to large, permanently protected grasslands, wetlands, and shallow lakes.

Furthermore, these wildlife buffers were targeted for landscapes with existing permanently protected habitat to accelerate progress toward achieving minimum thresholds of grass habitat required by waterfowl and other Species of Greatest Conservation Need. Many Species of Greatest Conservation Need benefit from large habitat patches and some require a minimum threshold of grassland habitat within a landscape.

Buffers are commonly viewed as simply a water quality practice, but buffers have notable positive impacts on wildlife due their unique upland and riverine habitat interaction. Not only are upland grasslands protected or restored, but detrimental impacts to stream-reliant biota is reduced. Many species of amphibians, such as southern MN's Northern Cricket Frog (endangered) rely on aquatic habitat during the breeding season and then spend most of their lives in upland habitat. In Southeastern MN, reptiles such as the Blanding's Turtle (endangered) rely on meandering streams, rivers, and adjacent lands.

A scoring mechanism was employed to fund high quality wildlife buffer enhancements and target these funds. Buffers for wildlife under this program were prioritized based upon their ability to enhance public land habitats (e.g., WPA's or WMA's), protect expiring CRP lands, add key nesting cover to wetland/upland complexes, provide maximum water quality benefits, and enhance shallow lakes.

At the time this appropriation became available, Minnesota had just over 200,000 acres of Conservation Reserve Program in buffer practices at various stages of their 10-15 year contracts, some soon to expire. The RIM Buffer program served as a complement to other programs to secure some of those expiring acres.

#### Explain Partners, Supporters, & Opposition:

Delivery of this program was a coordinated approach that brought together BWSR, DNR, local SWCD's, Pheasants Forever and other key conservation partners interested in private land conservation.

#### Additional Comments:

Exceptional challenges, expectations, failures, opportunities, or unique aspects of program

This was the second phase of the successful RIM Buffer program, which built upon the minimum required buffer width (funded with Clean Water Funds) and allowed these buffers to be expanded to a width more suitable for wildlife. Furthermore, bond funds were leveraged on twenty of the twenty nine easements where rounding out the remaining portion of a field would make the most sense to reduce offsite impacts and allow for additional restoration opportunities.

Local Soil and Water Conservation Districts (SWCDs) determined priority watersheds to target their efforts, and the scoring and ranking process used with this program selected those sites with the greatest environmental benefits.

This program was successful in securing sites where current CRP contracts were expiring. Landowner interest exceeded available funds and this program was able to secure the highest scoring sites.

#### Other Funds Received:

- Clean Water Fund
- Bond funds

#### How were the funds used to advanced the program:

This program used RIM and leveraged USDA conservation programs to deliver multiple enduring conservation benefits of clean water and wildlife habitat.

Indirectly, the Farm Bill Assistance Partnership with BWSR, DNR, PF, and SWCDs paid for SWCDs to hire technicians to promote conservation provisions of the Federal Farm Bill and other conservation programs to private landowners. Clean Water Funds and bond funds were used to expand buffer width, meaning that for every \$1 of OHF, over \$1 of CWF and bond funds were leveraged.

# What is the plan to sustain and/or maintain this work after the Outdoor Heritage Funds are expended:

Once a RIM easement is acquired, BWSR is responsible for monitoring and enforcement in perpetuity. The BWSR partners with local SWCDs to carry-out oversight, monitoring and inspection of its conservation easements. Easements are inspected for the first five

consecutive years beginning in the year after the easement is recorded. Thereafter, on-site inspections are performed every three years and compliance checks are performed in the other two years. SWCDs report to BWSR on each site inspection conducted and partners' staff document findings. A non-compliance procedure is implemented when potential violations or problems are identified. The amount listed for Easement Stewardship covers a portion of costs of the SWCD regular monitoring, BWSR oversight, and enforcement.

#### **Outcomes:**

The original accomplishment plan stated the program would

#### Programs in metropolitan urbanizing region:

Not Listed

#### How will the outcomes be measured and evaluated?

Not Listed

#### Programs in prairie region:

• Outcomes The permanent protection and restoration of 400 acres of grassland in the prairie region of Minnesota will produce significant wildlife benefits while also producing water quality benefits. Priority will be on enhancing and connecting past investments in public lands as well as shallow lakes to develop more sustainable systems and increase productivity of our lakes and habitats. The benefits of adding grassland buffers with 200â widths will increase wildlife production and provide benefits to the suite of grassland birds as well as game birds like mallards, blue-winged teal and ring-necked pheasants.

#### How will the outcomes be measured and evaluated?

1337 acres (all sources of funding) were protected and restored in this phase which exceeds the original goal of 400 acres of OHF funded buffers and 400 acres of CWF funded buffers. Bonding dollars were used to fund the remaining 537 acres.

### **Budget Spreadsheet**

Final Budget line item reallocations are allowed up to 10% and do not need require an amendment to the Accomplishment Plan

Total Amount: \$2,090,000

#### **Budget and Cash Leverage**

#### Target Lake/Stream/River Feet or Miles (final)

Λ

#### Explain the success/shortage of acre goals:

With 1337 acres (all sources of funding) protected and restored in this phase, we exceeded the original goal of 400 acres of OHF funded buffers and 400 acres of CWF funded buffers. The output tables show OHF dollars spent with acres apportioned out so that only "OHF acres" are shown.
